

SOUVENIR OF THE GREAT SALT LAKE, UTAH

This Great Dead Sea, the largest in the world, is located 18 miles west of Salt Lake City. It covers an approximate area of 2,140 square miles, being 50 miles wide and 75 miles long with an average depth of 13 feet. Like the Dead Sea in Palestine it is fed by the Jordan River, but has no known outlet other than evaporation. The Salt Shrimp is the only living insect known to exist therein. The water is 21 per cent salt and thousands of tons of salt are shipped annually from this source.

The water of the lake is so heavy one cannot sink, affording the most delightful bathing in the world, which is enjoyed by thousands each season.
